

# Northern Feather Canada

*Creators of Comfort*

## FROM THE CREATORS OF COMFORT

Northern Feather Canada is defined by a strong desire to help people experience greater sleeping comfort. The number of innovations we have introduced over the years – in product design, manufacturing technologies, and down and feather processing – is clear evidence of this priority.

## OVER 100 YEARS OF CANADIAN AND DANISH TRADITION

Originally founded in Denmark in 1901, Northern Feather Canada enjoys more than four decades of sleep success. H.O Lange cofounded Nordisk Fjerfabrik (Northern Feather) in 1901 and was the managing director of the company until 1961, he expanded the company in more than 21 countries. Northern Feather Canada was established in 1976 and for the past 4 decades has been a partnership and then solely owned by Tage Nilsson.

Northern Feather Canada offers the best value and quality in down and man-made fibre sleep products utilizing the highest and most technically advanced standards in manufacturing. We apply the latest in textile design, material processing and quality control becoming the experts of the down and feather industry. Making luxury bedding products at good value and providing the ultimate in sleeping comfort at the highest level of quality is what Northern Feather Canada does best.

*Our head office and manufacturing plant is located in Delta, B.C., Canada.*

- FLEXIBLE PRODUCTION CAPABILITIES

## CRAFTED IN CANADA

We have full control over the quality of our products and the environmental impact of our manufacturing, overseeing every aspect of production –from washing and conditioning raw materials to the final finishing touches – in Delta, B.C. Equipped with the latest technology, our British Columbia plant consistently produces superior down and feather products to our exacting standards of the highest quality.

We've outfitted our British Columbia manufacturing facility with the latest technology. Our inventory control systems, purchasing procedures, production lines, inspection stations and shipping operations are all state of the art. Each stage of the process from start to finish is closely monitored by well trained and experienced professionals.

## THE TOTAL SLEEP EXPERIENCE

We offer a wide selection of natural and man-made fibre fill sleep products so that you get the total sleep experience. We have a range of calendered cotton fabric to organic cotton, for our outer shells, matched with our superior thread count to ensure silky softness and divine drapability. From pillows, duvets, mattress toppers to luxurious bed linens, we are truly creators of comfort.

## PILLOW DENSITY

In order to find the right pillow, it is important to keep your personal preferences as the most important factor. What is inside a pillow makes a difference in support - some pillows are more squeezable, some will have more “oomph”, while others are in between. To maximize the options, Northern Feather Canada offers three distinct densities: **soft**: best for stomach sleepers, **medium**: best for all-around or back sleepers and **firm**: best for side sleepers.

Each of our duvets are packaged with a duvet level tag for easy recognition

## TEMPERATURE RATING SYSTEM

The most successful development by Northern Feather Canada is our Temperature Rating System for our duvets. Each of our duvets are given a warmth level rating of 1, 2 or 3 based on its ability to retain body heat. Instead of choosing by weight, you can select the duvet that best suits your favourite sleeping environment.

Whether you sleep in a **moderately warm room** (18 - 24°C, 64 - 75°F), a **cool room** (12 - 18°C, 54 - 64°F) or a **cold room** (6 - 12°C, 43 - 54°F), Northern Feather Canada has crafted a duvet to suit your personal comfort zone.

## FLOATING SOFTNESS

We provide two different types of mattress toppers: **natural fill featherbeds** and **man-made fibre sleep pads**. Our featherbeds are filled with a special combination blend of natural fills to allow maximum comfort throughout the night. Where as our sleep pads filled with unique fibres that simulate the properties of down, providing high resiliency and ability to loft. The down-like feel provides the ultimate in fluffy loft and comfort. By adding a mattress topper, you can continue to enjoy the support your body needs.

## OEKO-TEX CERTIFIED

All of our product shells are 100% Oeko-Tex® Certified. Northern Feather is the only home and textiles manufacturer in Canada that is Oeko-Tex® Certified. The certified label found on our products ensures that all materials used are safe for everyone and free of harmful chemicals and substances.
